BioGenesis

RE: BG-1103 Odor Control

Dear Pat,

This letter is to thank you for bringing us a product that really works.

Prior to using BioGenesis BG-1103 we were treating our 50,000 gallon sludge thickener hourly with a spray that didn't really work that well. Since April we have implemented BG-1103 into our process with outstanding results.

We now treat our sludge thickener once a week with just five pounds of BG-1103. Everyday we would have calls complaining of the odor from the Housing Division upwind from us. Since utilizing BioGenesis BG-1103 we have not had one call throughout the whole summer.

We look forward to testing your other BioGenesis products and if they work as well as the BG-1103, you can be sure we will continue to utilize BioGenesis technology.

Sincerely,

A handwritten signature in cursive script that reads "Joe Garde".
